

GET READY FOR WINTER!

Founded in Quebec, Groupe BBH knows that there is nothing worse than not having the appropriate winter equipment. That's why the company offers you a wide range of gloves and lined work clothes for winter.

We offer you several types of linings through our products each offering a different level of comfort and warmth. To help you identify your needs, see the chart and information below.

COLD PROTECTION SCALE

3M **Thinsulate** INSULATION / ISOLANT

Thinsulate™ is a microfiber based lining that holds body heat to keep you warm, but it also allows moisture to escape. This type of lining is thin and light, but still keeps you warm wherever you are and whatever you are doing.

There are different Thinsulate™ linings. G-100 insulation is made of an economical polyester (100 g/m²) whereas C-100 is a thin (105 g/m²) and compressible insulation that is breathable, moisture-resistant and hypoallergenic.
